OUR MOTTO

SEED & FLORAL CO

145 147 2nd St. PORTLAND ORE.

One of our Portland Bungalows with a small but beautiful lawn, shrubs and vines

Nothing adds a greater air of refinement to a home than a beautiful, well-kept lawn. The planting of a few shrubs and roses should not be forgotten. The pretty home above is "well done."

LAWN GRASS SEED

Though we offer, separately, seed of many of the grasses suitable for the lawn, we consider as very erroneous the somewhat prevalent idea that any single variety of grass seed is preferable or equal to a mixture.

R. R.'s EVERGREEN LAWN GRASS

To obtain a good Lawn Grass Mixture, it is necessary that the best possible seed of fine grasses be used in the combination, embracing such varieties as are of neat, close growth, extreme hardiness, and adapted to produce a quick, permanent sod. Judicious selection of seed, knowledge of the habits, vigor, quality and hardiness of varieties used in the mixture can only be gained by thorough and practical tests under different climatic and soil conditions. After many years' experience, we offer our pure, clean Evergreen Lawn Grass Seed Mixture, composed of a thoroughly balanced combination of various native and foreign fine-leaved, deep-rooting grasses of interweaving habit, that will flourish under varied soil and climatic conditions, and which may be depended upon to produce a beautiful, compact, evergreen sod that will resist tramping and hard usage, and at the same time present that handsome, velvety appearance so much desired.

R. R. EVERGREEN LAWN GRASS.—PRICE, 65c per lb., postpaid. Prices very unsettled; write, stating quantity wanted or size of lawn to be seeded.

Note.—You better spend a few cents or a dollar extra on the seed you buy and have a fine lawn that you'll be proud of. Sow 1 pound seed to 15 feet square for best results.

WHITE CLOVER.—Many gardeners like white clover mixed in lawn seeds and it is excellent, especially if your soil is heavy or poor. White clover grows quickly and acts as a nurse crop and protects the fine leaved grasses. Price, 65c lb., postpaid.

EVERGREEN LAWN, mixed with one-fourth WHITE CLOVER, 65c, postpaid.

EXTRA FANCY KENTUCKY BLUE GRASS, for lawns, 65c lb., postpaid.

IMPORTED CREEPING BENT GRASS, \$1.50 lb.; FANCY RED TOP for lawns, 40c lb. postpaid.

Seeds for Lawns and Special Mixtures

SEED.—There is as much difference between clean, high-grade grass and clover seeds for lawn making and the common or ordinary grass seeds as there is between high-grade white flour and bran. You would not think of trying to make light, white bread of bran, neither should you expect to make a fine, green, velvety lawn from low grade, light weight, immature and foul grass seeds. Weight, purity and germination is what sets the price of grass and clover seeds. We buy and use the highest grade, pure tested seeds for our Evergreen Lawn Grass Mixture. Of course, they cost more, but we know from experience that they give best results and are the only kind of seeds that it pays to use if you want a beautiful lawn. Do not buy low priced Lawn Grass Mixtures and expect good results. NO ONE gives you anything better than you pay for.

SPECIAL MIXTURES.—For all round general conditions, our Evergreen Mixture is unexcelled, but we will prepare special mixtures for shady places, low, wet soils, very dry soils and terraces. Just mention it when ordering.

FEED THE LAWN

Do not starve the grass if you want it to look green and velvety; use "Wonder" and "C-M," as per directions. See inside back cover.

Catalog of Bulbs, Plants, Roses, Etc.

Fall of 1922 — Spring of 1923

FLOWERING BULBS.—We pride ourselves on the high quality of stocks we offer in this catalog. Our Flowering Bulbs come from the most reliable growers in Holland, France and Japan. We buy the highest grade bulbs, for it is the only stock that is highly satisfactory. The large, round, properly matured bulbs we offer are far superior to most stocks imported. A trial will convince you.

ROSES, PLANTS, TREES AND VINES.—Oregon is famous for its wonderful Roses and Nursery Stock. Our strong, well-rooted, healthy stock transplants with much less loss and is superior in every way to the California or Eastern grown stock. We know from years of experience.

LOWER PRICES.—By comparing prices in this catalog with other Western catalogs you will see that prices are much lower, especially on flowering bulbs. We are mighty glad to be able to make lower prices and they ought to stimulate buying and enable planters to buy larger quantities. While all prices are not as low as pre-war prices, we do not believe they ever will be.

How to Plant and Raise Flowering Bulbs in Pots

The most fascinating, desirable and easiest flower to grow in pots for winter blooms inside or early spring flowers in the yard. You'll be successful if you follow our suggestions.

We supply Flower Pots, good earth, also Fancy Jardinieres.

Get a dozen inexpensive Bulb pans or pots, fill with rich sandy loam, and plant one to three bulbs in each. Pots are better than boxes for inside.

You can grow Hyacinths and Narcissus in water in bulb vases or fancy dishes.

Making the Roots Grow

After planting in soil or bulb fibre, water well and set away in a cool, dark cellar or closet for four to six weeks to make the roots grow. Good roots are very necessary to produce choice blooms.

Don't let them get dry.

If you leave the bulbs in the light, the tops grow before the roots, thereby making poor flowers.

Watch the Transformation

"from brown bulbs into beautiful flowering plants."

After the bulbs have made good roots, bring up two or three pots at a time, and set in a warm, sunny window to produce top growth. Water well with lukewarm water and don't let them dry out. Insects do not trouble flowering bulbs.

They Beautify Your Home

They are cheerful, bright and fragrant and last well. A good assortment will produce continuous blooms from Christmas to May.

PLANT IN YOUR WINDOW AND PORCH BOXES.—Fill your porch and window boxes with Tulips, Hyacinths or Narcissus. They are perfectly hardy and need no care. They will be through blooming in time to remove for Geraniums and summer flowering plants.

POT CULTURE OUTSIDE.—Plant Tulips, Narcissus, Crocus, early or late kinds, in pots and place in a sunny location in the garden; cover pots and all with loose dirt; keep well watered; after eight weeks or when in bud or flower dig up pot and all, wash off, take indoors. You will have blooms the equal of any florist product. Try a few pots. You'll be pleased.

Plant Crocus here and there over the lawn. They are very pretty and effective.

Dutch Bulbs bloom early when other flowers are scarce. Plant a bed of the brilliant and beautiful Tulips this fall.

Cultural Directions for Outdoor Planting Free with Every Order

HYACINTHS

Hyacinths are the most useful and popular of all hardy bulbs. They come in many lovely shades, and are exceedingly beautiful and fragrant. When planted in open ground in the fall they bloom splendidly very early in spring, and for house culture in pots they surpass all other flowers in exquisite beauty and delightful fragrance. They are among the easiest of all flowers to grow, and are absolutely sure to bloom, when you purchase such bulbs as we offer on this and the following page. The spike of bloom is already in the bulb when received, and all that is necessary is to give it warmth and moisture and it will burst forth with fragrance and grandeur.

Outdoor Culture.—The bulbs may be planted at any time from October to January—the earlier the better. Any well-drained garden soil is suitable. Plant in your windows or porch boxes. They will be through blooming in time for Geraniums, etc., for summer flowers. Set the bulbs so that the tops will be 3 or 4 inches below the surface and 8 or 10 inches apart.

Indoor Culture.—Plant in pots or boxes from October to January in light, rich soil. Have tops of bulbs just beneath surface of the soil. Water well and place the pots or boxes in a dark, cool place or in the garden and mulch heavily with straw or manure to hold the moisture. After eight weeks bring into the light.

R. S. & F. Co.'s Extra Select Choice MIXED HYACINTHS

SELECT DOUBLE-NAMED HYACINTHS

All Selected Top Size Bulbs. Price Each 20c; Doz. \$2.00

Double Hyacinths are not as popular as the single-belled varieties, for as a class the "doubles" although their individual bells are large and beautiful they do not make as well-filled trusses. For this reason we confine our list of varieties to a few of the very best.

BLOKSBERG—Pale porcelain blue with darker shadings; semi-double; very pretty.

CHESTNUT FLOWER—Fine light rose or pink with deeper shadings; bells very large.

GARRICK—Bright blue, large spike of double bells.

LA GRANDESSE—Pure white, fine large bells, unsurpassed for beauty and size.

PRESIDENT ROOSEVELT—Deep rose or red; produces a fine large flower spike.

Single Hyacinth

SELECT, SINGLE-NAMED HYACINTHS

Our selected named Hyacinths are the cream of the Holland nurseries and are offered under their original names. For forcing in pots or for outdoor beds they are unsurpassed. **Note**—The single-flowered varieties are generally more effective and better for forcing than the double ones.

The early sorts (those indicated by a *) do splendidly when grown in pots for winter blooming, but should be forced slower than Single Early Tulips by keeping them cooler. Plant them in pots; heel them in the garden until in bud and then bring them into the house. See bottom page 2.

COTTAGE GARDEN OR MAY-FLOWERING TULIPS

This beautiful class has become very popular. They are quite distinct from the early-flowering sorts, coming into bloom two or three weeks later and remaining in bloom much longer. On account of their extreme hardiness, they are specially adapted for the permanent hardy flower border, clumps or masses, wild gardens, etc. For bedding they are superb, while as cut flowers they are much to be preferred to the earlier type, having long stems with flowers of great substance.

CALEDONIA—Brilliant orange-scarlet, center yellow, marked blackish green; large cup-shaped flowers; very striking.

FAIRY QUEEN—A very large and beautiful flower of rosy heliotrope, broadly margined with yellow.

GESNERIANA SPATHULATA MAJOR—Superb, very large, of an intense brilliant crimson-scarlet with glittering blue-black center. No words or picture can begin to do this Tulip justice. It should be planted in generous quantity.

NARCISSUS OR DAFFODILS

The Narcissus affords perhaps more pleasure and satisfaction than any other flowering bulb. They may be grown either in or outdoors. They are very beautiful, very hardy, bloom freely, are delicately fragrant, thrive in almost any soil, and last for years without resetting. They may be grown in garden beds, among hardy plants in herbaceous borders, or "naturalized," that is, grown as if wild in outlying portions of the lawn or grounds, on terraced slopes and along semi-shaded paths.

The flowers of the different types are beautiful and of graceful forms, with a variety of color combinations, and many are delightfully fragrant.

NOTE—In describing these flowers we refer to the "trumpet," "crown" or "cup" as the center of the flower; the "perianth" is the surrounding row of petals or wings.

A clump of 50 or more bulbs put here and there among shrubbery, or interspersed in the hardy border, or naturalized in the grass, gives an indescribably rich effect in the early spring, while a vase of the cut blooms will fill a room with the rich, spicy odor.

CHINESE SACRED LILY

Also called "Shu Sin Far," or Water Fairy Flower. The flowers of this variety of Polyanthus are of a satiny white color, with very fragrant golden yellow cups. The dark green foliage is exceedingly luxuriant and beautiful. It is the sort grown by the Chinese from time immemorial to decorate their sacred temples or joss houses, on their New Year's day. By methods of culture original to them, they succeed in growing large, solid bulbs, which produce a profusion of bloom in an incredibly short time, usually not more than four to six weeks from the time of planting. This splendid flower increases in popularity every year, and immense quantities of bulbs are annually imported into this country.

Culture—Being partially aquatic, this plant must have plenty of water. If grown in earth, the soil should be light and sandy. Chinese Lilies are usually grown in bowls or dishes of water. Put enough fancy pebbles, coarse gravel, small rocks or shells around them to keep them from falling over; fill the dish with water and set in a dark, cool place, until the roots start freely, then bring them to the light and keep in an ordinary living room. A dozen bulbs started in this way at intervals will give a succession of bloom throughout the winter.

Select Imported Bulbs: Each 20c; 3 for 50c
Extra Large Bulbs: Each 25c; 3 for 65c

Chinese Sacred Lily

NOTE—The local Chinese gardeners put their bulbs in shallow pans of water out in the open for some time and bring into a warm room to flower as wanted.

No seed company in the world offers finer Sweet Pea Seed than we. The new orchid-flowered or Spencer types are the latest, largest and most beautiful.

PLANT THIS FALL.—In order to secure very early flowers, you must plant Sweet Peas in the fall, in well drained soil. The idea is to get the plants up a few inches before it gets so cold that the seed will not sprout. The plants will not grow much during the winter, but will start quickly with the first warm days of spring. In case of very severe weather, a light covering of straw or fir boughs will protect them from serious injury. If your soil and location are good for fall planting, you will have flowers by the time many people plant in the spring. Should you fail, you can plant again in the early spring, and not be out much. The results if you succeed are worth the effort and outlay.

La France Giant Everbearing Red Raspberry

A new variety of great merit, producing enormous crops of

BIG, RICH, SWEET, JUICY BERRIES from spring until late fall frosts

Superior to any other. Color rich, deep scarlet, very prolific, heavy cropper, absolutely hardy and free of disease. See cut.

We have watched the introduction of this berry, have tested it ourselves and secured reports of others who have tried it on the Pacific Coast. We have great faith in La France and advise you to get a good start at once. The plants multiply rapidly after the second year.

AWARDED FIRST-CLASS CERTIFICATES by New York, Massachusetts, Tarrytown, Nassau County, Morris County, Westchester and Fairfield Horticultural Societies, New York Florists' Club, American Institute of New York. Also

AWARDED SILVER MEDALS by New York, Tarrytown and Connecticut Horticultural Societies.

GENERAL DESCRIPTION.—LA FRANCE is a rapid, vigorous grower. The berries are firm, twice the size of most; beautiful color, fragrant and delicious in flavor all season long.

The fruit is borne on racemes, one to three feet long, in large clusters, and the same racemes show the unusual sight of buds, blooms, fruit just setting, green berries and the ripened fruit. This condition continues throughout the entire season. The late crops, when raspberries are scarce and high in price, is heavier than the earlier ones.

While the LA FRANCE is a giant in size and a rich, juicy fruit, it has proven to be a good shipper; 24 to 36 hours under ordinary conditions and up to 4 days under pre-cooled conditions, is one report we have.

PRICES FOR 1922-1923

"Wellington Marvel," a home Strawberry of Great Merit

WELLINGTON MARVEL

This new variety was originated by Wellington S. Butler, of Merlin, Ore., a Strawberry specialist.

Wellington's Marvel is almost frost-proof. The foliage is heavy and spreading, and each fruit-stalk of blossoms or fruit seems to be perfectly covered and protected. Fruiting season is very early, long and marvelously productive.

The ruddy glow of the Marvel spreads evenly and leaves no white tips. It is unequalled for table and excellent for canning. The flavor is incomparably delicious and sweet. For fruit juices or preserves the Marvel will demand the "top" prices.

Prices, postpaid: Doz. 60c; 100 \$3.00. NOT PREPAID, per 100 \$2.50; 500 \$12.00; 1,000 \$20.

EVERBEARING STRAWBERRIES

This class of strawberries is becoming more popular each year. Their long fruiting season is their real value. Left alone, they will flower and fruit the whole season, but to secure a large crop in the late fall keep the blooms off until the last of June. Keep the runners off to get full crop.

PROGRESSIVE EVERBEARING

Berries medium large, rather dark-red in color and of excellent quality. Ripens early and continuously; the fall crop is always profitable. Extremely hardy, bearing until the ground freezes. A valuable market variety, probably the most popular in the class.

Your choice, doz. 60c; 25 plants, \$1.00; 100, \$3.00, prepaid. Not prepaid, \$2.50 per 100; \$20.00 per 1,000. Write for special prices in quantity.

SUPERB EVERBEARING

Berries produced beneath the foliage, which protects them from frost and bad weather conditions. Come claim Superb is not so productive as Progressive, but its berries are larger, brighter red in color and of more delicious flavor. Good keepers and shippers.

STANDARD AND POPULAR WESTERN VARIETIES

OREGON IMPROVED—One of the finest and most satisfactory strawberries ever introduced. It always looks bright, fresh and attractive. The berry is very large, firm and handsome; rich, dark red, extending to the center. The flavor is rich, sweet and delicious. For table use and canning it cannot be surpassed. The "Oregon" ripens early and continues in bearing until late in the season.

MARSHALL—One of our best Western varieties and very popular wherever known. Marshall is one of the blood-red varieties that never fails to attract the eye and to satisfy the taste. It is deliciously sweet, generously prolific, and is in every way an ideal variety for extensive planting or home garden. Excellent for canning, as it holds its color, shape and flavor.

GOLD DOLLAR—One of the earliest berries on the market. Fruit good, medium size, and attractive; rather tart; fine flavor; foliage heavy, large and spreading, which protects the blooms from early frosts.

This comparatively new and very profitable rhubarb is claimed by our grower to be superior to all ordinary varieties and unequalled by any known marketable sort. Banwine is a quick, very early grower, producing very freely giant, heavy stalks, that are exceedingly tender, brittle and of the finest flavor and color. A "peerless" rhubarb for home gardens or for commercial plantings.

NUT TREES

RAISE ENGLISH WALNUTS—We can successfully raise English Walnuts here in the Pacific Northwest, and the quality of the nuts is superior to most other sections. Plant a tree or two at least, for your own use, and if you have a large place, plant more. While the cost of grafted stock is more, we advise you to plant them, as there is "no chance" as to quality of the nuts.

WALNUTS (D). Grafted Stock—This year we are prepared to supply you with Oregon-grown trees that are extra select and **ESPECIALLY FINE ROOTED**, much superior to the California trees on account of the fine growth of strong, fibrous roots. The stock we offer is Voorman's famous Franquette grafted on California black walnut roots.

Prices: 4 to 6 ft. and up, \$2.50 to \$5.00 each. Write for quantity price.

PARROTS

We handle more young parrots than all other Northwestern dealers combined. The young parrots arrive during July and August, but we aim to have stock on hand at all times. Price of trained talkers on request. We offer hand raised, not the wild, trapped, unmanageable birds.

PANAMA PARROT.—The most popular parrot with our trade. Of quite large size, gentle disposition, easily taught and become great favorites. Deep green plumage. They often show a yellow spot on the back of the head. Young, 6 to 8 months old, each \$25.00 and \$30.00; extra select, \$35.00; Old Parrots, Trained Talkers, \$50.00 and up.

B B OR DWARF PARROTS.—These cute little parrots make great pets. They are active, bright and wideawake. They are not much on the talk, but can be trained. Their dark green plumage is always smooth and pretty. Their gentle disposition and winning ways make them great favorites. Each, \$7.50 and \$10.00.

CUBAN PARROT.—Medium size, green plumage, red tips on wings, light face, gentle, fine pets, good talkers. Note below.

MEXICAN RED-HEADED PARROTS.—Medium size, trim and active, make fair talkers, gentle. Green plumage, bright red on head, blue in wing and tail.

NOTE.—Cubans and Mexican Parrots are cheaper in price than Panamas but not as good talkers. They were not to be had last year, but may be obtainable this coming fall. Write for prices.

PUPPIES AND DOGS

Buy your child a puppy and let them grow up together. Aside from the protection and companionship, educational experts advise that all children are better by having pets.

Our Pet Stock, Hutches and Kennels are inspected regularly by Dr. M. Howes, veterinarian, and member of the Oregon Humane Society.

Bring the kiddies to see the puppies in our window (West Side store), and visit our kennels at our Pet Stock Store on the East Side. See page 38.

Most buyers prefer a pup so it can be raised and trained to suit, but often someone wants a full-grown dog; we sell both. Our largest demand is for Fox or Irish Terriers, Toy, Boston and English Bulls, Airedales, Spitz, Cocker Spaniels and Scotch Collies, but we can also supply Setters, Pointers and most other breeds.

Prices.—If out-of-town customers will write and tell us what they want—breed, color and sex and what stock, fancy, pedigreed or just good, fairly pure strain, we are sure we can please you and give you extra good value. Prices on the different breeds and stock range from as low as \$7.50 to \$15.00 and up to \$50.00 to \$75.00.

WONDER (odorless) FERTILIZER

The best fertilizer for the city gardener; clean and odorless. Remember, it's all fertilizer; a wonder in action, a giant in strength, and the small amount necessary to use makes it the cheapest and most efficient high-grade fertilizer on the market, and last, but not least, it is odorless.

In "WONDER" we have a meritorious and odorless concentrated fertilizer, put up in small packages, thereby making its distribution a cheap and easy matter. Being a concentrated fertilizer, only a very small amount is required to produce the largest yield—a spoonful to a plant, a handful to a hill of potatoes, etc.

Remember, a 25-lb. bag of "WONDER" is equal, in plant food, to 100 lbs. of most any other commercial fertilizer on the market. Rich in potash.

FOR FERNS, PALMS AND HOUSE PLANTS, VEGETABLE AND FLOWER BEDS, LAWNS, FRUIT AND BERRY BUSHES, SHRUBS AND ROSES. DESCRIPTIVE LEAFLET ON REQUEST.

The "WONDER" fertilizer is sold only in 25-lb. white, clean, canvas bags, 2-lb. odorless cartons and 125-lb. sacks.

PRICES: 2-lb. cans (not postpaid), 30c (P. P. wgt. 2½ lbs.); 25-lb. drill bag, \$2.35; 3 bags, \$7.00; large 125-lb. sack, \$10.50. Full directions with each lot.

BY MAIL.—If wanted by parcel post, add postage. "Wonder" is odorless and 25-lb. bags will go by mail cheaper than express or freight in most cases.

NOTE.—Three sacks "C-M" and 1 25-lb. sack "Wonder" mixed together will make a very rich combination fertilizer, that will prove highly satisfactory for all uses, as it would be very rich in plant food and supply the necessary humus for heavy soils.

MURIATE OF POTASH

This fertilizer is especially valuable to fruit trees and berries. It increases the size and yield and makes a marked improvement in quality and color. Use about 200 lbs. per acre. Very valuable to use with stable manure, which is always shy of potash. Mix one-fourth Muriate of Potash with three-fourths "C-M" for greater results on root, fruit and berry crops.

Prices: 100 lbs. \$3.25; 500 lbs. up at \$3.00; ton prices on application.

BONE MEAL FERTILIZER

This is finely ground and of best quality. Used for lawns, roses, shrubs and trees. Not very quick in action and should be applied in the fall or very early spring. Use 1,000 to 2,000 lbs. per acre.

Prices: 5 lbs. 30c; 10 lbs. 50c; 100-lb. sack \$3.25; 5 to 20 sacks at \$3.00.

Ton Prices: Write for prices when ready to buy.

COW MANURE

Kiln-Dried Pulverized

For short we call it "C-M"

This product is one of the best and most satisfactory fertilizers on the market. Since we introduced it four years ago, thousands of our customers use nothing else.

It is cheaper, cleaner and better than the fresh stable manure. It supplies all the humus and fertilizing value of the old form without the disagreeable odor, coarse straw, chaff and live weed seeds. In fact, you get everything in an ideal form.

FOR ROSE OR FLOWER BEDS, BULBS, PLANTS AND SHRUBS, VEGETABLES, SEED BEDS, PORCH BOXES OR POTTING SOIL. USED IN LARGE QUANTITIES BY OUR BEST LAWN MAKERS AND BERRY GROWERS.

"C-M" is cheaper and more convenient. The old form cow manure costs about \$3.50 a load delivered and about \$3.00 or more to get it placed and spaded under. Three sacks of our Dry-Kiln C-M, which is practically odorless and can be spread around by anyone at leisure, will cost less and give better results.

Descriptive pamphlet on request. Full directions with each sack.

Prices: 2 lbs. 15c; 5 lbs. 25c; 10 lbs. 40c; 30 lbs. \$1.00; large sack (2 bu., 70 lbs.) \$2.00; 3 sacks \$5.50; 5 sacks \$9.00; 10 sacks \$17.50. Wire for quantity prices.

With our new fertilizer, Dry-Kiln "C-M" to supply humus, and "Wonder," the strongest and richest odorless chemical fertilizer, and "Ground Lime," the great soil conditioner, we have a combination that will supply every need.

GROUND LIME ROCK

Lime is an indirect soil improver and a very valuable conditioner, and releases the plant foods. Use ½ to 1 ton per acre. For heavy clay soil in the garden, double the amount.

Prices: 100-lb. sacks \$1.25; 500 lbs. \$5.00.

GARDEN LIME

(Fertilizer Lime).—This is put through a process that makes it finer and lighter than above. Quicker in action, richer in calcium, and well worth the higher price. Excellent for moss in lawns and general garden and farm lands. Use 500 to 1,000 lbs. per acre; 500 lbs. per city lot for heavy clay soil will give fine results.

Prices: 5 lbs. 25c; 10 lbs. 40c; 50 lbs. \$1.00; 100 lbs. \$1.75; 500 lbs. \$7.50.

SHEEP GUANO

Quite popular with some gardeners, but we prefer "C-M"

Prices: 100 lbs. \$2.00; 500 lbs. \$10.00.
